

## Macintosh File Locations Map for MR7 and RW4

April 2006

Here you will find the Mac location requirements for all of the files for MacRepertory 7 and ReferenceWorks 4. This is where the installer will place the files when you load the software onto your computer. Be aware that renaming or moving any files will cause your software to run improperly or not all. Also note that for older versions of our programs that the locations will be different. For more information on older versions, please contact technical support.

### Applications (root level)
